

**ExGAP™**

**Profile**

**Highlights:**

- A qualitative review of the effectiveness of your operation
- Fast, affordable and focused
- Performed by specialists in identifying ways to improve existing operations
- Involves key managers and selected supervisors & operators
- Results in an Execution Effectiveness Scorecard

**Profile Your Execution Gap**

The ExGAP Profile is a great way to begin to understand your Execution Gap and to get to know Perforex. This qualitative review of your operation identifies the difference between how your organization is currently operating and its potential. This small investment yields impressive output and is ideal to get staff bought into the opportunities surrounding execution, and sets the stage for an ExGAP Assessment or Analysis.

Perforex will dedicate its most seasoned specialists to conduct the Profile of your operation. The Perforex team will examine the operating discipline of your organization, the effectiveness of your management tools, and the processes that impact execution. The ExGAP Profile starts structured interviews with selected managers, supervisors, and operators, and then moves to shop floor observations where the quality and usage levels of your management processes will be examined.

**ExGAP™ Profile Deliverables**

You will be provided with a snapshot of your organization's execution effectiveness. An Execution Effectiveness Scorecard will outline the results of the review, and identify opportunities for improvement within your operations. Not least, the ExGAP Profile will challenge the prevailing view of how your business is currently managed and the results generated.

*"The ExGAP Profile highlighted opportunities for improvement within my operation that I would otherwise never have considered."*

**Northwestern  
Manufacturer**

*"I was weary of investing a lot of time and money in consulting services without proof that my operation could really benefit from them. The ExGAP Profile was a quick and inexpensive way to increase my level of comfort. I have now hired Perforex for a complete ExGAP Project, and they have exceeded the targeted financial impacts"*
